

# ALL POWER ANYTIME. ANYWHERE

## ▶▶▶ Developments based on client's requirements

### Developments based on client's

Our development and engineering personnel are able to design on short notice, a solution based on your requirements. The result is a functional tested and documented system, which meets all your specifications. We offer this R & D support in the field of power supplies, battery chargers and battery or system monitoring and also for complex vehicle drive controls for electric cars,

cleaning machines forklifts etc. Our production line is certified ISO 9001 and we can also manufacture your prototype products or manufacture your small lot series production. We can provide of conventional mounting machines and coordinate SMD mountings in our production facilities.

## ▶▶▶ Service & Maintenance

### Service & Maintenance

We offer a 100% testing and documentation of our working processes according to our ISO 9001 certified quality management system.

Highly complex electronic systems need extensive care to maintain their reliability. We offer the necessary service and maintenance with our qualified and dedicated personnel. We optimise your installations and avoid costly breakdown of equipment. This comprehensive program includes the servicing of the batteries. Out of one hand you obtain the necessary services to keep up your installations for an uninterrupted operation.

Our battery service programme discovers damages before the batteries fail. Each battery is indi-

vidually monitored which improves its working life. We arrange the safe removal and disposal of worn out batteries. Our service is available 7 days per week and 24 hours per day.

The results of our investigation are summarized in comprehensive reports enhanced by clear, user friendly diagrams and tables. Recommendation for necessary actions is given. Our service personnel work in accordance with valid European standards. All wiring diagrams shop layouts and commissioning instructions are stored in our central database. Our service team assists you during all trouble shootings.

## ▶▶▶ Certifications

All our products meet the CE requirements. Many products have approvals of CCA, CB, UL or VDS. Our production line is regularly examined according ISO 9001.
